## A CALL FROM LATUR

The victims of the massive earthquake disaster in Latur, Osmanabad and other regions of Marathwada are looking to us to help them overcome the ravages of the disaster. There is need for a holistic approach - physical, psychological and social. While help in the form of materials (and money) has been forthcoming, there is need for more resources and particularly qualified and trained persons and preferably those who know Hindi or Marathi. We need committed people, who have empathy for these unfortunate people.

### WON'T YOU RESPOND TO THIS CALL?

The Community Health Cell is in contact with other organisations like Service Civil International, Catholic Hospital Association of India, Oxfam, Action Aid and others already involved. You could be part of the team of doctors, nurses, social workers and volunteers.

If willing, please contact :
